**[Track 03-11]**

M: Really Different Houses

Two billion people live in cities. Most of them live in a flat. Another two billion people live around cities. Most of these people live in a house. All the other people live outside cities, in the countryside. Many live on farms. But some live in really different houses.

1, Ice House

How do people build houses in very cold places? There is only snow and ice. There are no trees. There are rocks, but they are under the ice. An igloo is an ice house. It's made with just ice! An igloo might look cold. But the inside of an igloo is nice and warm.

#### 2, A House on the Water

Some people want to live on the water. They can live on a boat. Houseboats are special houses on the water. These houses move from place to place very easily. Ahoy!

#### 3, Living in the Trees

Some people like to live next to nature. They can! They can build a tree house. A tree house can be small, but there are big tree houses, too. They have everything a normal house has! Now people can live comfortably next to nature.

W: How We Travel

Undergrounds and buses are a great way to travel in cities. Many people take the underground or a bus every day. This reduces traffic and pollution made by cars. But can people do more? People in Amsterdam think they can! Their answer is bicycles! More than 40% of all people living in Amsterdam ride a bicycle to work every day!

High speed trains such as the Shanghai Maglev can travel at 420 kilometres per hour. But 420 km/h is not as fast as a plane. An aeroplane can fly at 900 to 1000 km/h. Scientists hope to change this.

They're working on a new train called the Hyperloop. This train might be able to go 1,200 km/h!

Why drive when you don't have to? No. I'm not talking about a taxi. I'm talking about a self-driving car! There are cars that drive on their own. But they're not 100% safe. So people don't trust them.

But self-driving cars are helping people in many ways. They park themselves, and they help to avoid accidents!

W: Yes, I did. I finished sweeping the floor.

M: Devi's Diary

Saturday. Today, I went hiking with my dad. He loves the mountains. It was easy when we started. After an hour, my feet hurt. I said, "Dad, I want to drink something." He gave me a bottle of water. I took the top off and drank half the bottle. Then, we went up, up, up the mountain for one more hour! I felt really tired. Every time I stopped, my dad said, "Don't stop now. We are almost at the top!" Finally, we reached the top. I saw everything below us. It was great! I hugged my dad and said, "We did it! I'm so glad we came!" Then we went home, and my dad made me a big dinner! I had a great day!

W: Hi, I'm Brianne and I live in a small town in Minnesota. It's a state in the north of the US. It gets very cold and snowy here in the winter. Before the snow comes, it is very dark and cloudy. When it's snowing heavily in the winter, it's difficult to go to the shop to buy food, so we buy everything before the winter starts, in September or October. In the winter, it's always chilly outside so we store food outside: it's a natural fridge! After it becomes warmer in the spring and summer, we can go out and swim or go fishing in the lake. It's so beautiful.

M: Hello, my name is Anil. I'm an engineer, and because of my work I'm living in the Gobi Desert. It's a desert, so of course, it's usually very dry. But in the south, it rains a little in June or July. After it rains, small green plants start to grow everywhere.

Before we go outside, we have to wear the right clothes – we wear sunglasses and a hat to protect us from the hot sun. Sometimes it gets very windy, so the sand flies everywhere. Before this happens, we go inside and close all the windows. It's terrible!

W2: This weekend, the weather is going to be cold and cloudy, so I will wear a warm coat.

**[Track 10-09]**

M: And now, over to the weather forecast with Isabel. What's it going to be like, Isabel?

W: Thanks, Jeremy. It's going to be changing a lot. On Saturday morning it's going to be cold with temperatures going up to 7 degrees Celsius. But on Saturday night there's going to be a storm coming up from the south. Before the storm arrives, it's going to be cloudy and cool, with temperatures at 10 degrees Celsius. When the storm comes there's going to be very heavy rain and strong winds. The temperature is going to go down to minus three. On Sunday it's going to be freezing in the morning, with temperatures at minus 3 degrees Celsius. In the afternoon it's going to get warmer and sunny, going up to 26 degrees. Monday is going to be the same with a little rain in the evening. That's all for the weather. Have a great weekend!
